## POLIOMYELITIS (INFANTILE PARALYSIS)

Present indications are that this disease may assume epidemic or near epidemic proportions during the late summer and fall months of this year. For this reason the Department of Health of the Province has forbidden assemblies of children of 17 years of age and under until further notice. Whether or not the schools will remain closed will depend upon circumstances. Parents are urgently requested to keep their children from assembling in groups for play on the streets or elsewhere. By such measures they may do much to prevent spread of the disease.

**General Precautionary Measures--**  
-- Keep children away from crowds. Allow them out-of-doors as much as able but not contacted with groups of other children. Keep them by themselves as far as possible.

Give children wholesome and easy digested food, including plenty of milk and vegetables. Raw vegetables and fruit should be thoroughly washed. Milk should be kept cold and carefully protected from flies.

Children should have ample rest. Twelve hours sleep in a well ventilated bed room.

The home should be kept thoroughly clean and free from flies.

Because of the great variation in the onset of poliomyelitis, at a time when the disease is prevalent, children showing any evidence of a departure from normal health should be carefully watched and isolated. It is urgent that prompt medical attention should be given in all cases.

--The mild types of the disease which recover in a few days without any paralysis, and the carriers who harbor the virus of the disease but do not develop it, are now known to be most important factors in the spread of infection and render control of the disease very difficult.

--When the disease is prevalent, all children known to be ill and not receiving attention should be reported to the Health District Office.

At the time of writing no cases have been reported in our territory. Let us endeavor to continue without a case.

ROSEBUD HEALTH DISTRICT

## Poultry Marketing Board Will Operate.

Alberta's poultry marketing board is expected to be in operation in time for fall production, according to Hon. E. C. Manning. Announcing completion of organization and plans for the acquisition of offices, he said, "Regulations relating to the licensing of dealers and to grading of poultry products are in the process of preparation and shortly will be issued. A board, in accordance with a producers' mandate, will market eggs and other poultry products on a consolidated basis on behalf of the producers in the province. Board members are: E. C. Christensen, managing director of the Northern Alberta Dairy Pool; C. W. Traves, provincial poultry commissioner; K. Daplet, president of poultry producers' association; R. Rix, Wetaskiwin and S. Roppel, Rockyford.

## School Teachers Receive Allocations

The teachers in the Olds School Division have recently been allocated to their respective schools.

There has been a large turnover in the teaching staff of the Division, resignations and leave of absences making it necessary to appoint 36 new teachers. A large percentage of the male school teachers have joined the forces and have been given leave of absence for the duration of the war.

In this immediate district considerable changes have been made, only six teachers remaining in the positions they held last year.

The following are the teachers appointed to the schools contributory to Didsbury:

WEST	
Clovermount	Miss P. E. Volstad
Melvin	Gwyneth Anderson
Springside	Jean Grant
Westcott	Archie Evanson
Rugby	Alberta Hutchinson
Zella	Mrs. L. Swancoot
Inverness	Muriel Rowe
Elkton	Orvy Davidson
Bergen	Helen Bishop
Ideswold	Mrs. J. Halverson
Red Deer Valley	Winnie Jackson
Fallen Timber	Ronald Knight
Waterloo	Miss Lorne McEwen
EAST	
Roschud	Joan Robertson
Grand Centre	Volva Varr
Neapolis	Idris Jenkins
	Francis Hendrickson
Mona	Kathleen Keen
Jutland	Mrs. A. C. Ball
Stuart	Jeanann R. Bell
Burnside	Miss Elsie Spanten
Salem	Harold Shore
	Leo Summers
Gore	Mr. T. Hanson
Huntcliff	Isabell Tweedie

Other local teachers in the Division are:

Meadowside	Miss Jo Booker
Pinecroft	Joyce Jackson
Hawkeye	Mary Wrigglesworth

British guest children resident in Alberta have made good standing in school examinations, it was stated by C. B. Hill of the Provincial Child Welfare Department, who is director in charge of guest children for the province, having recently returned from an inspection tour of the guests. Mr. Hill said the children are delighted with their foster homes and he expressed satisfaction with conditions and progress made by the children.

Unlike some liquids that improve as they grow older, gasoline suffers from age. The older gasoline gets the less volatile it becomes, the more likely it is to form resinous substances which in time interfere with the operation of the engine. Moreover gasoline which has been stored any length of time under certain conditions loses much of its anti knock quality.

## Municipal Finances Have Improved

The finances of the Mountain View Municipality was shown improved considerably by the municipal inspector's report which was presented at the meeting of the Mountain View Municipal Council, held in Olds last week.

The report revealed the books of the municipality as in good order and in his remarks the inspector pointed out that, as the result of the successful collection of both arrears and current taxes, the bank loans had been reduced considerably. The municipal loan, since the first of the year reduced from \$16,100.00 to \$8,750.00, and the school loan reduced from \$8,400 to \$2,150. All school requisitions had been paid up to date.

The matter of making applications under the Prairie Farmers Assistance Act was discussed. Opinions were expressed that two townships in the municipality would qualify under the Act and the secretary was instructed to take the matter up with the P.F.A. Branch at Regina.

It was reported that the grading of a three mile stretch on the town line east of Olds had been completed and that a road west of the railway running north had been constructed. It was also reported that a bridge on the Lone Pine near the McAllister farm had been completed.

The quarterly report of the Rosebud Health Unit was read and discussed.

The secretary reported that the amount of relief paid in July was \$25.00 and that one report of the board of review under the Farmers Arrangement Act had been received.

## Obituary.

GEORGE A. BURNS

Funeral services for the late Geo. A. Burns, who passed away in the Holy Cross Hospital in Calgary after a long illness, were held Friday last at the Knox United Church, Didsbury, Rev. J. M. Fawcett officiated, and during the service, a solo was sung by Mr. Harry Fawcett of Edmonton.

The funeral was attended by the members of the King Hiram Masonic Lodge, of which Mr. Burns was past master and the last rites of the Masonic Lodge was conferred at the graveside by Wor. C. E. Ford, P. M.

The pallbearers were Worshipful Master J. Topley and Past Masters A. Brusso, Dr. Clarke, W. M. Smith, of the Didsbury Lodge and James Murray and Guy Burke of Olds.

Mr. Burns was an old timer in Didsbury district, coming here with his parents and brothers in the spring of 1901. For some years he farmed in the Hanna district and for some time resided in Calgary. Returning to Didsbury in 1921 when together with his brother John, he established the present farm east of Didsbury where he resided until his death.

He took an active part in all public affairs and was a prominent member of the U. F. A. He also had been a member of the board of the Olds School Division No. 31 since its inauguration in 1939.

He is survived by his wife, a daughter Marjorie, three sons, Kenneth, Douglas and Harold, and two brothers, Spencer at Hanna and Russell in Ontario.

## Grain Club Scores

The seed plots of the Didsbury Junior Grain Club, were judged during the first part of August and considering the damages from hail and the dry weather, the results were very favorable.

The club is sponsored by the Alberta Wheat Pool and the Provincial Gov't and is under the leadership of E. I. DeMann. The boys each sow a 4 acre plot of registered seed, the seed being supplied by the sponsors. Mr. Hugh McPhail, district agriculturalist from Olds, was the judge of the plots.

The following are the results of the competition:

Teddy Dageford 79 points, Don Schultz 78, Alex McNair 76, Cyril Brook 76, John Bruce 75, Walter Neufeld 74, John Kobut 72, Edward Weibe 70, Lester Barnes 68, Harold Burns 66, Lester Krebs 65.

During the winter a Seed Fair will be held when sample of the seed wheat grown on these plots will be judged.

## Patriotic Hen Lays a "Victory" Egg.

We have heard of the V for Victory sign appearing on eggs and other things, but now we have an authentic case in this district.

Mrs. Earl Klinek brought in an egg on Monday with a perfect raised V on the end which was laid on their farm. We don't know whether the hen knows anything about it but Klineks certainly have a patriotic hen on their farm.

## Evangelical Church Notes

The subject at the morning worship service will be "Making light of Christ and Salvation." Which occupies the larger part in our lives the material or the spiritual.

The topic at the evening service will be "The making of a minister," describing the great change in Paul's life when he gave his heart to Christ.

Sunday school will be held at Jutland at 2 p.m. and divine service at 8 p.m.

## Red Cross Croquet Tournament.

The Junior Red Cross Tea Committee will hold a Croquet tournament on Dr. MacPherson's lawn, the week starting Aug. 25. All those interested please sign their name on lists appearing in Halliday's Grocery Law's Drug store and the Post Office. Everybody welcome. 10 cents an entry. Prizes—Watch for further notice about schedules. (No children under 17 on account of Provincial ban.)

Miss Muriel Brightman and Ronald Brightman of Calgary spent the weekend at their home here.

## Wheat Acreage Reduced 37%

According to the reports under the Wheat Reduction Acreage Scheme the wheat acreage in the Mountain View Municipality has been reduced 37% in 1941 from the 1940 acreage and 43% from the 1939 acreage.

The reports show that 475 applications for bonus under the scheme, had been received from farmers and 228 applications from landlords.

Out of the total reports received only 12 showed that no reduction had been made.

David Shannon, Sr., a resident of Olds district for the past 55 years, passed away at his home here on Friday morning following a lengthy illness. He was born at Killorglin, County Kerry, Ireland, on March 17, 1861. He came to Canada in 1881 and later to Alberta in 1883 when he worked on the construction of the C. P. R. Line to Craigellachie. Later on he worked on the C. & E. railroad from Calgary to Edmonton, and in 1886 settled in Olds, taking over the C. & E. station until it was acquired by the C. P. R.

We have just received another shipment of those big roomy 1.00 shirts—at Scott's.

## Adults Or Children

"Either we must act like adults or we must expect to be treated like children," declared one of the younger prominent business men in one of the Western Canadian cities recently.

The declaration was inspired by the comparatively recent decision of the Dominion oil controller to curtail the hours in which gasoline may be sold, together with other restrictions designed to bring home to the people of this country the imperative need for conserving gasoline, fuel oils and other derivatives of petroleum in order that more fuel may be released for driving aeroplanes, tanks and other weapons in the battle against Nazism.

The statement of this young business man was not inspired alone by the comparatively moderate restrictions imposed by the oil controller, but by apparent evidence on all sides of a tendency on the part of too many to fail to appreciate the very urgent need for conservation of gasoline and to disregard the general appeal to the public to reduce pleasure driving by at least 50 per cent, which accompanied the announcement of the imposition of the restrictions.

As this same young man said, it would be a sad commentary on the practical operation of our democracy if we are not willing to sacrifice a few pleasures in order to preserve it; if, as has been suggested it should be necessary to impose a system of gasoline rationing in order to enforce conservation of this essential war material; if, in other words, we have to be treated like children, because we do not act on our own initiative like grown-ups are expected to act.

### One Of Two Reasons

If the appeal to curb our appetites for driving automobiles in pursuit of pleasure does not receive the general response which the cause requires, it can only be for one of two reasons: Either the need for conservation of gasoline is not as fully appreciated as it should be, or we are loath to forego a few non-essential pleasures as one of the contributions that can so easily be made to the war effort. If the latter, can we conscientiously subscribe to the theory that we are waging an "all-out" effort? Can we hope and expect to strike the knockout blow that must be delivered if victory is to crown our efforts and if we are not to become bondsmen in the House of Hitler?

There should be no misunderstanding as to the need for the very modest restrictions that have been imposed so far. There should be no misapprehension as to the necessity of going farther than these restrictions as a voluntary effort. There is every reason why we should "act like adults" and demonstrate that the democracy we espouse is a living thing. It is inconceivable that we would not do so, if we understood the reason and appreciated the dire necessity.

There is no one who understands the situation who will not subscribe to Churchill's declaration that the ultimate on come of this war lies in the decision of the Battle of the Atlantic, the fight on the water between this continent and Great Britain. If Britain is defeated there, the life line of the Empire and of democracy is severed. Supplies of war material and food to the front line are cut off. Gasoline is the first requisite, first to the winning of the Battle of the Atlantic and subsequently to the winning of the war. Every Canadian who burns a gallon of gasoline unnecessarily, in the light of these facts, should ask himself: "Am I willing to do this when the gasoline I am using for personal enjoyment, might be used to save a ship carrying food to rationed comrades in Britain from being sunk to the bottom of the ocean, or prevent a boat carrying our gallant boys and their fighting equipment from being destroyed?"

### Works No Injury

Figures have been made public showing that consumption of gasoline in Canada far outstrips production and this is also true of the balance between consumption and production in Western Canada, and what is more domestic consumption is increasing by leaps and bounds. It is true that a great deal of the gasoline and fuel oil consumed in Western Canada is required for agricultural and industrial purposes, but it is also true that a considerable percentage is used for the pursuit of pleasure and most of the latter, perhaps all of it, could be eliminated without doing anyone an injury.

The excess of consumption over production has to be imported, either by ocean or lake tankers or by tank cars on the railways from the United States. The tankers are urgently needed to convey gasoline overseas to provide fuel for fighters and bombers and motor boats engaged in the Battle of the Atlantic and tank cars from the United States should be released for the use of gasoline required for the rapidly accelerating defence measures on the other side of the international boundary. Moreover, the fact should not be overlooked that every Canadian dollar sent into the United States for the purchase of gasoline to be used in pleasure driving could be utilized to much greater advantage in the prosecution of the Canadian war effort.

We sing: "There'll always be an England." Yes, we believe that, but we must also believe that it will be so, only if we help to make it so.

First Pedestrian: "I wish I had the money that was paid for all those cars going by."

Second Pedestrian: "I wish I had the money that is still due on them."

Until the middle of the 18th century, earthquakes were believed to be caused by winds rushing through great subterranean caverns.

## WOMEN WANTED

35 to 52 years old. Women who are restless, moody, NERVOUS—who have hot flashes, dizzy spells—to take Lydia E. Pinkham's Vegetable Compound. Pinkham's is famous for helping women during these "trying times" due to functional irregularities. Get a bottle today from your druggist. WORTH TRYING!

## New Radio Alert Receiver

Would Replace Sirens In Air Raid Warnings

Mayor F. H. La Guardia of New York expressed belief that the ringing of a bell in the new radio alert receiver, which responds automatically to an inaudible signal, would replace sirens as air raid warnings.

La Guardia, national director of civilian defence, engaged in a trans-Atlantic conversation by radio with Maj. F. W. Jackson, chief of the London fire brigade, and W. B. Brett, chief operational officer of the London civilian defence.

A test of the new device, which summons listeners to their receivers even though the sets are not turned on, was made earlier. David Sarnoff, president of the Radio Corporation of America, took part in the demonstration, described the successful results for the British officials.

The London defence heads were assured by Sarnoff that England would be permitted to manufacture the special type receiver.

Sarnoff said the receiver rang a bell to summon listeners and shut off when an all-clear signal was flashed. It functions 24 hours a day.

He said the device is the size of a portable radio, could be attached to standard radio sets, and manufactured in quantity for "somewhere around \$15 or perhaps less."

## A Giant Flywheel

Made In Britain For Use In South African Mine

In two minutes a load of eight tons can be brought up from a mine 6,000 feet down by an electric winder sent out from Great Britain to one of the City Deep mines in South Africa, states the St. Thomas Times-Journal. Two similar equipments completed for South Africa carry drums 36 feet across, believed to be the biggest ever made for electric winders. Forty tons is the weight of the single piece flywheel in cast steel included in each motor generator set for equalization purposes.

The same engineering shops have turned out many overseas jobs during the past year, including large turbo-alternators for India, Canada and Australia. They are now building four additional rectifiers for the Natal section of the South African Railways similar to those supplied a few years ago for the main line electrification between Durban and Volksrust—the largest system in the world operating with inverted rectifiers.

## SELECTED RECIPES

### KRISPY PARTY CHEWS

1 cup butter  
1 cup brown sugar  
1 cup flour  
2 eggs  
1 cup brown sugar  
1 teaspoon vanilla extract  
1 teaspoon salt  
1 cup shredded coconut  
1 cup oven-popped rice cereal  
1 cup chopped nuts  
Cream butter and sugar thoroughly. Add flour and blend well with fork or dough blender. Press mixture in bottom of shallow baking pan. Bake in moderate oven (350 degrees F.) about 15 minutes or until delicately browned.

Beat eggs well, add sugar gradually and continue beating until light and fluffy. Add flavoring, salt, coconut, oven-popped rice cereal and nut meats. Mix well. Drop by spoonfuls on top of previously baked crust and spread evenly. Bake in moderate oven (350 degrees F.) about 25 minutes. Remove from pan and cut into squares while warm. Yield: Forty 1½-inch squares (9 x 13-inch pan).

### Curiosity Killed A Cat

And Cut Off Electrical Supply In St. John's For Hours

For several hours industrial life in St. John's, Nfld., was halted because a stray cat wandered into a high tension wire and caused a short circuit that cut off the city's electrical supply.

Stymied by the sabotaging cat, killed by the current, were loading docks, machine shops, service stations and every electrically controlled operation.

Quite frequently it has been found that the brain of an idiot weighs more than that of a man of superior talent. So it isn't how much brain you have, it is the use you put it to.

The United States has 125,000 miles of oil pipelines.

## Bee Hive Syrup

"FEEL EVER SO MUCH BETTER SINCE I'VE BEEN EATING KELLOGG'S ALL-BRAN"

"I suffered from constipation for some time, and tried all kinds of medicine, but relief lasted only a short time. Finally I tried ALL-BRAN, and I am ever so much better since eating this delicious cereal every morning," writes H. Mason, St. Faustin Village, Que. KELLOGG'S ALL-BRAN helps you get at the cause of constipation due to lack of the right kind

of "bulk" in the diet. Eat this delicious cereal (or try it in muffins) every day and drink plenty of water. But remember, it doesn't work like harsh purgatives. . . . ALL-BRAN takes time. At your grocer's, in two convenient size packages or in individual serving packages at restaurants. Made by Kellogg's in London, Canada.

### Made Long Voyage

Ferryboats, Built On Clyde Reached Turkish Waters Unescorted

The Brockville Recorder and Times says: One of the longest unescorted voyages of the war must have been made by the seven ferryboats built on the Clyde which are reported to have reached Turkish waters. Although these vessels are not more than 140 feet in length, they travelled 14,000 miles through dangerous and often stormy seas, without escort, to reach their destination. For 20 days at a time the vessels were out of sight of land and three times the frail craft had to turn back because of storms. But every one of them, in the hands of British crews, arrived safely in the Bosphorus.

### Supplied Another

At least one Canadian has a bona fide excuse for losing his registration card. Officials at Ottawa disclosed a Canadian doctor with the British forces in the Middle East wrote that he lost his original card in the Battle of Crete, and could the authorities supply another, please? The authorities could, and did.

### Have Proved Experts

Women pilots of the British air transport auxiliary have been so successful the authorities have decided to employ more of them. During the last six months they have delivered more than 1,000 aircraft without a mishap.

### Fastest Man On Wings

British Test Pilot Is Given The George Medal

The fastest man on wings—though he is shy of the title—is Flight Lieut. Philip Gadesden Lucas, chief test pilot of the Hawker Aircraft Company.

He received the George Medal for what he himself modestly describes as a "grand thrill." The grand thrill took place when Lucas tested and suddenly dived a new and untried plane—with all the drive of its 2,300 horsepower engines. The machine, the Typhoon, newest and deadliest of British fighters pulled safely out of the dive and was landed.

## WORLD HAPPENINGS BRIEFLY TOLD

There are about 30 different types of warplane models now being produced for Great Britain and Canada by the United States.

Service by gasoline-powered cars on 38 lines has been suspended because of fuel shortage, the Japanese railways ministry announced.

War-time need has boosted Canada's steel production to 2,250,000 tons a year from a 1935-38 yearly average of 1,300,000 tons.

United States citizens in India were reported to have offered the Bengal government their services in civil defence work, the British Broadcasting Corporation reported.

German girls must spend a half-year in "auxiliary war service" after completing six months in the reich labor service, the government decreed.

Eire is to buy tea direct from India, it was stated in the Daily recently. Twenty ships are to be purchased for the new trade, at an estimated cost of £102,000 (\$453,900).

It can now be revealed that Sunday, July 6, was London's sunniest day in more than 42 years. The sun shone 15 hours and 48 minutes, 50 minutes more than the previous high.

A. C. Burdick, president of North Vancouver Ship Repairs, Ltd., announced that the company's plant will be enlarged and that a new 10,000-ton floating drydock will be constructed immediately.

Various suggestions for minimizing the wartime shortage of farm labor come under study of the different branches of the federal government from time to time, it was learned.

## Maritime Consciousness

### Manitoba Has Sea Coast Of More Than 400 Miles

To those who live by the Atlantic or Pacific shores or near the Great Lakes, and who think that Manitoba is purely inland and a region of land-lubbers, "Manitoba Calling", published by CKY, has this to say:

"Actually, we in this part of Canada have a distinctly maritime consciousness. Apparently far from the sea, we are not so far in fact. The salt waters of Hudson Bay roll in upon more than 400 miles of Manitoba sea coast. Churchill, ancient trading post named in honor of him who became the Duke of Marlborough and ancestor of Britain's present Prime Minister, has been developed as a modern port for trans-Atlantic traffic.

"Our fresh water lakes are numerous and expansive. Lake Winnipeg is larger than Lake Ontario. In addition to the angling, sailing and boating attractions offered to sportsmen, we have a considerable commercial fishing industry which in 1940 handled more than 25 million pounds with a market value of nearly two million dollars.

"Most remarkable is our training of men for the Royal Canadian Navy, the Naval Reserve and the Merchant Service. Manitoba's sailor men are on the seven seas, serving King and Country in battleships and destroyers, transport and little cargo boats. Numbers of them obtained their introduction to seamanship, signalling, wireless telegraphy and naval discipline in the Winnipeg Sea Cadet Corps. Thence they passed into the Winnipeg barracks of the Royal Canadian Naval Volunteer Reserve and so to sea. Winnipeg Free Press.

The cooling of forgings for airplane motors is controlled so that it takes several days for the steel to cool down from about 2,000 degrees Fahrenheit.

## Silk Substitutes

### Will Be Used To Replace Imports From Japan

Eliminate silk stockings from consideration, Ottawa officials said, and Canada's problem of replacing raw silk imports from Japan can be conquered.

"Hosiery still is the one big question mark," said an official in close touch with the silk situation as it affects Canada. He estimated that before the war 85 per cent. of Japanese silk imported by the Dominion was used in manufacture of silk stockings.

"It's a problem that may be hard to solve completely and satisfactorily but we're constantly working to develop substitutes and much research work is being done," he said.

When silk imports from Japan were banned this year a graduated curtailment scale whereby manufacturers were limited to progressively diminishing quotas of their 1940 production was adopted. This had served to cushion the loss of Japanese silk and the official said Canada probably still has enough to last until the end of the present year.

"Outside of hosiery," he added, "I don't think we have anything to worry about."

Silk lingerie worn by women would be affected, he explained, but he doubted if women would notice any change when rayon was used exclusively to replace silk. Previously, lingerie had been made from all-rayon fabric, a rayon-silk fabric and a pure-silk fabric.

"Now the manufacturers voluntarily have decided to eliminate the last two types of manufacture, and all lingerie will be made from rayon fabric, most of it obtained in Canada," he said.

Rayon would also be used exclusively for bright-print dresses formerly manufactured from pure silk. Silk linings used in fur coats would be replaced by rayon lining, but the change was not expected to affect prices. Silk handkerchiefs also would be replaced.

Viscose and acetate rayon fabric, chief Canadian-produced substitutes for silk, are manufactured at factories in Cornwall, Ont., and Drummondville, Que. A viscose rayon plant may also be established in Vancouver.

## Doing Their Best

Three thousand sea boat stockings made of wool spun by people of Tibet and knitted by natives of Bengal were received in London by the Navy League Seafarer's Comforts Fund. They were of the "circular type" because the natives don't know how to knit heels.

## WELL-FITTING SLIP FOR WOMEN

By Anne Adams

Have you a plentiful slip supply to see you through the hot-weather stretch ahead? This Anne Adams slip, Pattern 4763, is so easy to make, so well-fitting, that you'll stitch it up in two and three. What a perfect style for the mature figure! That full-length panel goes smoothly down the front; those high, slanting side-seams keep your waist smooth and trim and neatly hold in the gathered fullness above. Notice that the front straps are cut in-one with the side bodice sections. The entire back is a single piece, straps and all, with darting at the waistline to smooth the garment to your contours. For the feminine charm you love, use an edging of lace.

Pattern 4763 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 2½ yards 39 inch fabric and 3¾ yards lace edging. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg, Man.

## BILL THOMPSON ON HOLIDAYS

Horatio K. Boomer, Nick de Popolos and the Old Timer were holiday guests at Banff in July, but they registered under one signature. . . . "Bill Thompson." The Bill, the clever young impersonator who has been with Fibber McGee and Molly show for some time, is shown tuning his pipes on the terrace of Banff Springs Hotel while a member of the Banff Mounted Police looks on. Bill's hobbies are collecting authentic books on Scottish clans and tartans and playing the bagpipes.

## Fine Art Production

### Britain Is Doing Big Business With Collectors In United States

America is a steady and increasing buyer of British fine art reproductions: mezzotints, wood-cuts, etchings, dry-points, colour-collotypes, lithograph and four-colour process work.

In the first three months of the present year one British publisher alone sent across the Atlantic 70,000 dollars worth of reproductions. Most of these went to buyers in New York, Boston, Chicago and Washington.

The total value of this luxury trade, the survival of which in war time, without any actual increase at all, would have been astonishing, is to-day in the neighborhood of half a million dollars a year.

Into the workshops of British publishers, in a steady stream, are coming orders for reproduction by the collotype process, works from outstanding American artists like Hovsep Pushman, Ethelwyn Stewart, R. E. Bishop and Wayne Davis. Before the war Germany exported many collotype reproductions, a market which British publishers have now entirely captured.

To-day Britain is the leading producer of mezzotints, paying her engravers one thousand dollars a plate and turning out work which is being collected by discerning American collectors. They are to-day, paying as much as \$50 for a single reproduction. Rare impressions from fine mezzotint plates have realized up to \$1,000 for one impression.

Canada is also a buyer of British fine art reproductions. There the preference, shared by South Africa, Australia and New Zealand, is for collotype and four-colour process work.

## Need Of Metals

### Aluminum The Most Abundant Metal, Is Now Very Scarce

Two of the most paradoxical bottlenecks the war has produced are those due to a scarcity of aluminum and a scarcity of magnesium. Aluminum is the most abundant metal in the world. Nearly eight per cent. of the earth's crust is composed of it. Magnesium is the eighth most abundant metal. Both are light metals and as such are of high importance in airplane building. But the supply of both is short and airplane building is hampered by that fact.

The use of aluminum in airplane building is well known. Aluminum weighs only about a third as much as steel. When aluminum and steel are combined in an alloy, both strength and lightness are achieved. So, aluminum alloys are used for both the structure and the engines of airplanes. Indeed, aluminum is said to enter into 90 per cent. of the average plane.

Magnesium is only two-thirds as heavy as aluminum, about one-quarter of the weight of steel, and its alloys are equal in strength, tensile properties and ductility to aluminum alloys.

British Columbia might well be doing something to relieve the magnesium bottleneck. The Cariboo country, in the neighborhood of Clinton and elsewhere contains great deposits not yet fully prospected of both magnesium hydroxide and magnesium sulphate or epsom salts. By D.A.M. in the Vancouver Province.

## Talent In Regiment

### Men From Quebec In Army Tank Brigade Are Musicians

Switching from trombone to tanks, Tpr. Frank E. Johnson, Negro swing artist from Verdun, Quebec, went to the war, and it looks as though his Quebec Regiment in the Army Tank Brigade will eventually have an orchestra to chase the blues away. Tpr. Johnson, who played a hot trombone in Toronto night clubs and around Montreal, says there is talent in his regiment for an 11-piece band. They even took their own instruments with them.

## DEFECTS OF TEETH

According to reports received by the Health League of Canada, defects of the teeth are the most frequent grounds for rejection of U.S. draftees, it was stated at League offices at Toronto. Among those accepted, the proportion not in need of some form of dental treatment was said to be only about one in 500.

While statistics on similar conditions in Canada were not available, said an official of the Health League, he believed that they would be fairly proportionate, allowing for the far greater number of slum dwellers and underprivileged rural communities in the United States.

He suggested that the remedy lay, not primarily with corrective dental work but with adequate nutrition. Many children, he declared, suffer from a deficiency of vitamins and mineral salts which lead to dental decay. In such cases, dental troubles began in childhood.

Another factor, he believed, was that among low-wage earners and workers with large families, the family budget allowed little for dental care, though all children would be the better for regular dental as well as medical examination. For this reason he believed there should be a concerted move to establish free dental clinics in large urban districts.

A properly balanced diet and periodical mouth inspection with a view to combating dental decay at its outset, were the best safeguards against conditions such as those revealed in the United States report, he asserted.

## Cargo Shipping

### United States Plans Greatly Increased Tonnage Next Year

Heartening news came from Washington this week. It told that according to revised estimates United States shipyards in 1942 will turn out 5,314,000 gross tons of cargo shipping.

That is more cargo shipping than German subs and bombers have managed to sink during the past twelve months. It is far more tonnage than the annual toll of the Nazis on the basis of June sinkings.

It may be, of course, that these United States estimates will not be met entirely by production. Also, the great bulk of these United States ships may not be available until near the close of 1942. Nevertheless the revelation here is that, so far as the Battle of the Atlantic is concerned, time is all against Germany.

In other words, if Britain is to be starved out the starving must be done in the next six or eight months. The starving, at the moment, seems far from probable. Ottawa Journal.

Key West, Fla., is more than 600 miles farther south than Los Angeles, Calif. 2424

**Burnside Notes**

Mr. and Mrs. Sam Riddle, of Carstairs, spent Sunday with their niece, Mrs. Robert Eckel.

Mr. S. A. Cipperley, and his sons George, Elmer, Paul and Glen, of Waeha, Iowa, are spending a couple weeks with the former's son C. L. Cipperley and family here. Enroute they visited the Yellowstone Park and on their return they will visit relatives in Washington.

Mr. and Mrs. J. E. Gooder, Miss Gladys Coulter and L. A. C. Lewis Spraggs visited with Mr. Albert Spraggs, and at the Cipperley home on Sunday.

Mr. Ronald Lyons left on Saturday night for Brandon having joined the airforce as a gunner.

Mr. and Mrs. Wilbur Tolton of Acme called on Mr. and Mrs. W. Lyons on Sunday.

Mr. and Mrs. Cecil Cipperley and family drove up from Calgary to visit the former's parents and meet his grandfather and uncles.

The Lone Pine W.I. held their August meeting at the home of Mrs. Edna Dowell. Mrs. Joe Clarke had charge of the topic "Canadianization and Immigration." Mrs. Jim McCulloch reported on the Farm Women's Rest Week which she had attended as a delegate from the Institute. Mrs. Bert Pross won the table bouquet contest. Mrs. Eckel gave a report of the Constituency conference recently held at Rugby. Mrs. F. Ahlgrim won the 10c draw and Mrs. Emilie Richardson the War Savings Certificate for this month. Mrs. Otto Faas won the flower naming contest conducted by Mrs. Bert Pross. The meeting closed with a bountiful lunch followed by ice cream.

Genuine Indian Tanned Buckskin Gloves only 1.25—at Scotts.

**Inverness Items**

The Inverness Beaver Club met at the home of Mrs. W. H. Davies on August 7th with 10 ladies present and a collection of \$1.25 was taken for tea. We were very pleased to have Mrs. Frey at our meeting. The afternoon was spent in knitting and the usual sewing was passed out and returned. Mrs. Brown donated enough blocks for a quilt top. At the close of the afternoon Mrs. Davies and Mrs. Youngs served a very nice lunch. The next meeting is to be held at Mrs. Thompson's on August 26.

Miss Jo Booker of Didsbury is spending two weeks visiting Mr. and Mrs. E. Grace of Westward Ho.

**Rugby Notes**

Members of Rugby and Elkton Soldiers Comfort Club are holding a tea, in Rugby Hall, Wed. afternoon Aug. 27. Proceeds for local boys parcels. Everybody welcome.

**Leadership by Example**

While there are some in Canada who would have preferred some system of rationing gasoline and oil rather than the voluntary plan which has been launched, most Canadians will agree that the Oil Controller's move sets a splendid objective for a democratic people.

If motor car drivers of Canada cut down the consumption of motor fuel by 50 per-cent, of their own free will, the achievement will stand out as a triumph for our way of living.

Human nature will be a prime factor in the success of the country's undertaking, however, many of us are prone to sit back and wait for the other man to take the initiative. We require leadership within the ranks, somebody to set the example, before we all commence to do the same together.

In this campaign to conserve gasoline and oil for the sake of the bombers overseas, an opportunity is presented to the humblest of our citizens to become a leader. If a man leaves his motor car in his garage for four days a week and proudly announces the fact to his friends in the community, he will be rendering a service to his country of no mean value.

**May Ration Gas  
In Canada**

Rationing of gasoline supplies to filling stations in the eastern United States, announced at Washington last week, will likely result in similar action in Canada, G. R. Cottrelle federal oil controller, said in a brief statement this week.

"We will likely do the same thing but to what extent as yet has we do not know," the statement said.

"In any event, it will be as much or more. As a matter of fact, because of a reduction in sales, deliveries have already been reduced."

**The World of Wheat**

By H. G. L. Strange

Director, Research Department,  
Searle Grain Company, Ltd.

Medical people, nutritionists, millers, bakers and students of grain marketing, have all joined hands in Canada, Great Britain, United States and Australia in an effort to advance the new method of making a white loaf of bread that will contain a large quantity of all the components in the Vitiman "B" family.

Bread made for thousands of years by the old-fashioned stone mills used to contain a generous amount of all these Vitimans, but that bread would not keep for long, and so it could not be safely transported very far.

The modern method of making flour by rolling mills makes a white flour and bread, which will keep almost indefinitely, and so flour can be transported great distances. Our present white flour and bread, therefore, has materially helped in making more bread, and cheaper, available to the peoples of the world. Unfortunately this bread does not contain as much of those essential B vitamins as did the bread of old. A new method of milling, however, has been discovered by which a white flour can be made that will keep well, and so can be transported, and which in addition will contain a satisfactory amount of the essential Vitiman B as did the bread from the old stone milled flour.

Following factors have tended to raise prices: Dry weather continues in eastern Australia -- Wheat and feed crop prospects continue poor over large areas of Alberta and Saskatchewan -- Canadian and U.S. flour mills have been heavy buyers lately -- Scandinavian and Balkan crop prospects continue poor.

Following factors have tended to lower prices: Latest official estimate of U.S. 1941 wheat crop revised upward to 951 million bushels -- Heavy Argentine and U.S. corn stocks create serious storage problems -- Canadian wheat "carryover" on July 31st, has been officially placed at 480 million bushels, the highest on record.

### CHAPTER XIX.

"It's so nice of you to bother to take me home, Mr. Macias," Devona said, trying hard to ignore the subtle possessiveness in his smile, his manner. "I'm really terribly tired to-night."

"No bother at all." His dark eyes laughed at her elaborate pretenses a little. "I suppose you want to put those things in the safe?"

He nodded at the little bundle in her hand—the handsome mantilla, the locket and fan.

"Yes, please, I'm sure they will be safer there than in my dressing room."

With quick, deft fingers, he turned

the dial, opened the heavy steel door, reached for the pile of treasures Devona had laid on his desk.

The safe, she noticed without really intending to, was full of little square white boxes. And bundles of currency rolled together with elastic bands. Idly, she wondered how much money was tucked away in there, and why he preferred to keep it there instead of in a bank. Probably, Macias was just money-lover enough to enjoy having his wealth where he could count it, admire it, touch it with those long, brown fingers.

She was still staring when Macias turned toward her. Flushing a little under the swift, hard look he gave her, the almost insulting vigor with which he slammed the safe shut, swung the portrait back into place, she faced him across a sudden, throbbing little silence.

Finally he said, quietly but with unmistakable warning, "No one but me—and now you—knows where that safe is hidden."

"Oh—really?"

"The man who installed it is dead," he went on. "I've never showed it to any one else. Understand?"

"Perfectly." She tried to smile away the implication. "I'll keep your secret."

"Yes, you will." But there was no smile with it.

And Devona was suddenly aware that she had been given a glimpse of some secret vulnerability in this hard, ruthless man. He had some secret—some guilty secret. One that he was deliberately revealing to her—gradually. She would learn the whole of it, in time.

Macias calmly picked up his expensive, pearl-gray homberg. "Shall we go now?"

Devona nodded. "Yes, please," and started to open the door.

"This way," Macias said and, pushing a light switch, uncovered a small, pearl-white button. Silently, stealthily, a panel slid aside, revealing a narrow hallway, a door beyond. "It saves a little time."

Aware that his quick glance was losing nothing of her astonishment, Devona tried desperately to control her expression. But this was all so uncanny, so melodramatic. A wall safe, yes. But why a secret passageway?

"No one but me—and now you—knows about this passageway, either," he said as he stood aside, motioned for her to precede him into the narrow little hall. Then he closed the panel behind him, led the way to the small door at the end.

"It's terribly exciting," she said as he helped her into the broad front seat of his custom-built convertible coupe. He used the limousine when he had guests and when he wanted Joe to do the driving. He only drove the coupe himself on his frequent mysterious errands alone. Devona

wished desperately for Joe and the limousine now. "But what is it for the secret passage way, I mean," she rattled on, bly bely.

"Convenience," he said, cryptically. "Some day—I'll show you."

Another promise of adventure! Devona went a little cold.

Macias slipped into the seat beside her, started the powerful car with quick, deft movements.

"I'm still staying at the Brownstone," she said, chaffily, trying to hide her mounting nervousness even from herself. "It's three blocks down and then up to Main St."

"Yes, I know." He turned the car out of the dark alley into the blazing corridor of lights.

Down three blocks and then he turned. Up to Main. The Brownstone's neon sign blinked at her from down the block. Devona began to let go of some of the terror that had stalked her for the last hour. Silly. He really meant nothing more than to take her home, actually. Just the thoughtfulness of an employer for his overly weary employee. She'd misjudged him. Overwrought, she'd let her imagination run away with her.

"Thank you so much," she began—and then stopped short. He was driving right past the Brownstone's modest entrance. . . . "But you've passed it!"

His smile answered her first. Then, "I just thought we'd take a little ride first. It's such a lovely evening."

The long, powerful car rapidly put hundreds of city blocks behind them before it turned off the main boulevard into a quieter street, lined by towering apartment houses. And when Macias turned into a gravelled drive, stopped under the canopied entrance, Devona still was not sure she wasn't having a nightmare.

A hurried doorman opened the door and helped her out.

"Good evening, sir," he said deferentially. "Shall I take your car around?"

"Might as well," Macias nodded curtly, led the way into the softly lighted foyer.

"Yes, sir."

Behind her, Devona heard the soft purr of the engine as the car slid out of the drive, out of sight. Underfoot, she felt the soft luxury of rich Oriental rugs. "Louis Quatorze" was emblazoned on a heraldic shield ornamenting the doorways, embroidered into the soft draperies. This, she realized as Macias rang for the elevator, was where he lived.

Still numb, afraid to go on, and still more afraid to stop, she stepped

into the gold and velvet elevator cage. A moment later, Macias' dark-skinned house-boy was bowing them into an elaborately furnished living room. At first, Devona saw only deep-cushioned, elaborately carved furniture, heavy chests that might have been heirlooms preserved in some rich Spanish nobleman's castle, thick carpets, dozens of massively framed oil paintings. The whole scene heavy with gold and red velvet—and obviously costly.

Then she noticed the little table set before the fireplace—a table set for TWO!

"How—nice," she murmured, managed to move calmly toward the fire, to pretend to warm her numbed fingers.

"How delicious," she said a little later as the well-trained houseboy served very excellent lobster under glass and very old champagne.

Delicious, stimulating, the food and wine lent her courage—a courage she realized only too well of which she'd have great need if she carried this through without blundering.

Because, of course, the excellent little supper, the warming fire, the quiet in imacy of this elaborate room were only strains of the overture before the curtain went up on the main action.

Her eyes wandered over the handsome grand piano, the massive lamps, vases that were huge, costly. Everything the biggest, the most that money could buy. Symbols of Macias' power to buy and buy and buy.

She came back to the situation with a jolt. And she was next on his shopping list!

"Well, and do you like it?" he asked, and the question told her he had missed none of her silent study of his room.

"It's very elaborate," she said honestly. "The effect is—overwhelming. So many priceless, beautiful things—"

Then, to avoid that dark-eyed scrutiny, she rose suddenly, crossed to the big window behind her. Below, Los Angeles and its constellation of satellite cities spread a carpet of shimmering lights as far as she could see. "And your view, too. It's simply breathtaking!"

Macias had followed her, stood now just behind her shoulder. "You appreciate beautiful things, don't you?"

Devona shrugged. "I enjoy them." And then, because talking seemed safer than silences, "My father taught me, really. If it hadn't been for his tremendous interest in the art centres we travelled through in the fine, beautiful things that different civilizations had created, I probably wouldn't have been so interested."

"That's probably what makes you a different—and very charming person."

"Thank you," and, to distract his attention, "Tell me about your pictures."

Moving toward it, Macias ran one finger, almost caressingly, over the rough surface of the canvas. "Come here, a moment."

Obediently, she went to stand beside him. Taking her hand in his, he touched her forefinger to the soft smudge that might easily have been mistaken for the artist's signature, pressed it a moment. And to her amazement, the painting slid out of sight leaving a yawning, dark aperture. Devona gasped. Another secret hiding place.

"Oh—how—startling!"

"Clever, isn't it?" Macias beamed proudly. "I invented this one myself."

"Yes, very clever," and she couldn't help seeing that this hiding place, too, was piled with square boxes, with rolls of currency. Why was he showing her all this? Why was he flaunting his enormous rolls of money, his strange devices for hiding them?

As if in answer, he drew the painting back into place, turned toward her quietly.

"I'm glad you like it here," he said, "because I want you to stay."

For an instant, Devona just stared at the picture of the tall Monterey pine tossing its limbs grotesquely while the sea clawed at its roots. Then as the silence failed to hide Macias' meaning, she turned slowly to face him, her heart a frozen lump in her throat.

## HOME SERVICE

### WHEN TOO TIRED FOR FUN NERVES MAY BE TO BLAME

#### Her Energy Used Up In Worry

Too tired—no matter what gay plans are afoot! But why—if she's not ill? "Nerves," perhaps.

If you feel exhausted all the time but have nothing organically wrong with you, you're probably the high-strung type, letting worry eat up all your energy.

And yet, just because you are high-strung, you could be one of the most charming and vital people if you would turn those inward energies outward.

How to do it? Try to understand what's making you nervous. Is there some problem you've tried to ignore?

An unsolved problem, you know, can be as alive and destructive as a disease germ. The thing to do is to force it to the surface. Out in the open it can be driven away.

But ignore it, grow still more tired and irritable, and you'll drive away friends and family instead. You'll be right on the road to a nervous breakdown.

Our 32-page booklet explains causes of "nerves" and "nervous" symptoms such as indigestion, insomnia. Describes a physical and mental program to overcome them. Gives right diet, body care for sound nerves, vitality.

Send 15c in coins for your copy of "Overcoming Nerves and Every-Day Health Problems" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

- 168—"Etiquette: The Correct Thing To Do"
- 193—"Fashion Drawing Made Easy"
- 198—"Announcements, Showers and Birthday Parties"
- WP—"Woodcraft Patterns"
- 121—"How To Improve Your Vocabulary"
- 130—"World's Best-Loved Poems"

### Vitamins For Soldiers

#### Use Would Keep Eyesight In Better Condition

Proper supplies of vitamin in the soldier's diet will not only maintain his general health but may save his life in action by keeping his eyesight in good condition. It was stated in documents tabled for a parliamentary sub-committee on war expenditures.

Brig. R. M. Gossline, director of army medical services, gave the committee copies of circular letters sent to all district medical officers.

Officers were reminded that if a person did not receive an adequate supply of vitamin C, resistance against disease was lowered. A moderate lack of vitamin C was probably a factor in the development of some mouth conditions, such as trench mouth.

Raw cabbage and raw turnips are excellent sources of vitamin C, but if the cooking is prolonged, over 90 per cent. of the vitamin originally present is lost. Potatoes contained a small amount of vitamin C.

Tomatoes were considered most important as a source of vitamin C.

For the best level of health 5,000 to 6,000 units daily of vitamin A are required, and the ordinary hospital diet of the Canadian army furnishes 6,635 units daily.

### Fine Is Heavy

A fine of five pounds has been authorized in cases where persons allow dogs to stray over lots and gardens in Britain. The order is intended to protect small gardens in which precious food is being grown.

### LOCAL & GENERAL

Mrs. Harold Oke left on Saturday for a motor trip to the Central States. She accompanied her brother and mother on the trip.

Mr. and Mrs. Foote and Mrs. Reiffenstein motored to Banff on Sunday to visit with their sons.

Art Evans is one of the latest recruits for the airforce, and will report on September 9th.

Mrs. J. Ady and family have moved from the farm east of town and taken up residence in Lyle Munro's residence.

Ronnie Lyons and Cyril White received their call for the airforce and left on Saturday for Calgary to report.

Mrs. Elwood Evans and small daughter, Judy, of Pincher Creek, have been visiting with Dr. and Mrs. Evans the past week.

L-Cpl. Sid Summers, who is stationed at Camp Borden, is home on furlough for a couple weeks.

Mr. and Mrs. Stock, of Olds, visited with their daughter Mrs. J. Boorman and family this week.

Mr. and Mrs. James Sevice, of Brooks, Alta., visited with Mr. and Mrs. A. Brusco over the week end. Mrs. Sevice is a niece of Mrs. Brusco's.

Ernest Whalley, of the Star Chief garage, left for his vacation on Friday. He will visit his home at Armstrong, B.C., and will also visit at Vancouver.

How about buying your harvest shoes at Scott's from 2.50 up.

Mrs. Leonard Devins of Calgary spent a few days with her parents, Mr. and Mrs. D. M. Sinclair.

Rev. Jas. Ferguson of Nelson, B.C., visited his sister and other relatives and friends last week. Mr. Ferguson was the first minister in these parts, coming here in 1901.

Pt. and Mrs. Walter Green of Vancouver is visiting the latter's sister Mrs. Glenn Durant and family. Pte. Green is with the Army Medical Corp at Vancouver.

To have twin calves born on a farm is not unusual but to have 2 pairs of twins born within one week is exceptional. This occurred on the Henry Fisher farm on Monday and Thursday of last week.

The alterations at the Friesen building are now complete and fixtures installed for a modern grocery store. The store will be opened by Charlie Geiger under the Red and White system, with the special opening on Friday and Saturday Aug. 29th and 30th.

Mr. and Mrs. Herb Sinclair accompanied the latter's brother, Albert Cluny, as far as Calgary on Sunday when he returned to his home in Vancouver after spending several months here.

Editor W. Worton, of the Tofteld Mercury, called at the Pioneer office on Saturday on his way home from a vacation at Banff. Mr. Worton informed us that he worked on the "Pioneer" 31 years ago.

Mr. and Mrs. M. J. Hearst spent the week end at the home of Mrs. Hearst's parents, Mr. and Mrs. H. E. Pearson. Mr. Hearst, who for past two years has taught at Wayne, has accepted a position on the Calgary public school staff.

Eidon Foote and Roy Reiffenstein are spending a few weeks at Banff. They have been engaged as caddies at the Banff Springs golf course.

"No No Nanette" the tea for two musical romance, with Anna Neagle, is the special feature this week at the Didsbury Theatre. A picture you are sure to enjoy.

Chas. Mortimer, along with Russell Ady, took his two sons, Don and Bobby out to the Dog Pound to teach them the art of fishing. Don managed to hook three and Bob says he had a strike. Russell managed to get his limit, but Charlie was too busy coaching the boys.

### Notice of Poll Tax

Westerdale M.D., 311

A minimum tax of four dollars for municipal purposes shall be paid by every person assessed upon the assessment and tax roll in respect of any property in case the tax payable by such person in respect of such property in any year amounts to a sum of less than four dollars, and an annual tax of four dollars shall also be paid by every resident of the district of the fullage of twenty-one years who has resided therein for a period of one month or more during any calendar year and is gainfully employed and has not been assessed upon the roll, whether he has resided in the district before the date of the completion of the roll or not; but in the case of the collection of such tax, the name of such resident so paying shall be added to the roll of the said calendar year.

Every employer shall furnish from month to month, upon request of the secretary-treasurer, the names of all persons in his employment, and the secretary-treasurer by a notice in writing may require the employer or employers to deduct from the next payment made to any employee who is named in the notice and has not paid any tax for the payment of which the employee is liable under the said sections, the amount of the tax, and to forward the same to the secretary-treasurer immediately after making the deduction hereinbefore directed.

A. McNAUGHTON,  
Secretary-Treasurer.

Mr. and Mrs. Jack Pearson of Bashaw, were visiting at the Halliday home on Thursday and Friday. We understand the came to attend a wedding, but were too late.

Rev. John M. Fawcett drove to Munson on Monday to preside at a special service for the Designation of a Deaconess of the United Church. He returned on Monday night.

### United Church Notes.

Services as usual at all points next Sunday. There will not be any Sunday School sessions, and children seventeen and under are requested not to attend the church services until the ban is lifted.

The Minister will speak on "The peril of the neutral life".

### CARD OF THANKS

We wish to extend to our friends and neighbors, our sincere thanks for the many expressions of sympathy and floral tributes during the illness and at the time of our loss of a loving husband and father. We also wish to thank the nurses and Dr. Clarke for their untiring efforts during the time he was in the Didsbury General Hospital.

Mrs. G. A. Burns and family

### COME IN AND SEE

Exclusive Features Provided Only in VOSS WASHERS

#### Suds Washing with Floating Agitation

#### Suds Washed Clothes Always Whiter

Suds washing means utilizing the clean rich top suds to free the clothes of dirt. The floating agitator forces 480 shots of rich clean suds per minute down into the clothes. Dirt freed from clothes settles to the bottom and is not thrown back into the clothes.

#### Double Safety of Electro-Safe Wringer

Double Safety Means:— First: electric safety — turning off the switch and stopping the engine. Second: mechanical safety roll tension release. Both operate automatically, instantly and independently of each other.

The Electro-safe Wringer is worth the price of a washer in an emergency.

Modern Stream-lined Styling . . . All White in Color . . .  
Trouble-Free Mechanism
